

KARRATHA WASTEWATER TREATMENT PLANT

Project description

Water Corporation in Western Australia enlisted Pentair to design and supply a vertical multistage booster pump set for the Karratha wastewater treatment plant. The pump set included base, pipework and the necessary valves and equipment as well as 12 earthing lugs for electrical protection.

Pentair products

2 x SBN90-05 vertical multistage 316SS pump directly coupled to a 37kW electric motor.
