

WELLMASTER

Regulation 31 Drinking Water Flexible Rising Main System

The Wellmaster range is the Flexible Rising Main System for all types of ground water extraction and well monitoring operations.

Its simplicity of installation makes Wellmaster the cost-effective alternative to rigid pipe. Wellmaster is manufactured from high tenacity synthetic yarns, circular woven and totally encapsulated in a tough elastomeric polyurethane lining and cover. The riser has an integral textile reinforced rib for location of the power cable strapping system. The larger sizes have two ribs.

Features

- Regulation 31 UK Drinking Water Inspectorate
- Regulation 27 Drinking Water Scotland
- Total corrosion, microbiological and internal scaling resistance
- Long operational life with a 10 year warranty*
- High abrasion resistant lining and cover
- Superior hydraulic performance with low friction loss for a reduced operating cost
- Rapid installation and retrieval resulting in substantial labour and cost savings
- Available with a range of reusable field-fittable high security 316 stainless steel couplings and a full range of other accessories.
- Diameters from 38mm – 200mm
- Range includes WM150, WM250 and WM400
- Manufactured under Angus Flexible Pipelines ISO 9001 Quality Management Systems accreditation
- Angus Environmental Management System complies with ISO 14001

Wellmaster's performance is proven over thirty years in over 70,000 installations.

* if installed by an Angus approved installer
