

## EMERALD AQUATIC CENTRE

---

### Project description

The Emerald Aquatic Centre refurbishment and upgrade was completed in late 2013. The refurbishment included the construction of a new Olympic sized pool, learn to swim pool and enclosure as well as a splash-pad water play park along with the associated plant and change rooms. For Pentair this project involved the replacement of a competitor's product offering that failed more than once inside the warranty period. Pentair's offering was supplied with certified testing from our Withcott, Queensland factory. The value of the complete project was around \$9 million.
